Re: Draft Baseline Human Health Risk Assessment – Operable Unit 03 (OU-3): Groundwater
Cornell-Dubilier Electronics Superfund Site, South Plainfield, NJ
U.S. Army Corps of Engineers Contract Number W912DQ-08-D-0017, TO 0008

Dear Mr. Maas:

On the heels of last week's Draft Remedial Investigation (RI) Report, Louis Berger and Malcolm Pirnie are very pleased to submit this Draft version of the Baseline Human Health Risk Assessment (BHHRA) Report for Operable Unit 03 (Groundwater) at the Cornell-Dubilier Electronics Superfund Site. This document supports the Draft RI, and the findings presented are consistent with those discussed in recent meetings and conference calls between USACE, USEPA, and Louis Berger / Malcolm Pirnie. This is the second of three scheduled Draft submissions: the Draft Feasibility Study is now scheduled to be submitted on July 8th.

The electronic file for the text, figures, and tables has been posted to:

<https://sp.louisberger.com/usace/CDEOU3/Shared%20Documents/Forms/AllItems.aspx>

The appendices will be posted Monday once they are all fully assembled. Hard copies of the Draft document will be sent out Monday.

Based on the June 6th version of the schedule, the Government has a 40 calendar day review period; comments are due to Louis Berger / Malcolm Pirnie by August 3rd. We understand that the comments will be delivered via Dr. Checks.

We look forward to your review of this critical document and discussing it with you. Please call me at 914-798-3711 or Rich Califano at 201-398-4307 if you have any questions.

Very truly yours,

THE LOUIS BERGER GROUP, INC.

Edward A. Dudek Jr., PE
Project Manager
